Experience

SaiQuest LLC **West Monroe, LA**
Business Analyst *September 2024 – Present*

- Analyze operational data and performance metrics to identify trends, recommending process improvements that increase front-desk efficiency and guest satisfaction.
- Design and maintain dashboards and reports to monitor occupancy, revenue, and service KPIs, improving decision-making visibility.
- Automate manual reporting workflows with Python, saving staff >10 hours weekly and reducing errors.

Price Waterhouse(PWC) LLP **Remote, US**
Software Engineer Consultant at Meta *October 2023 – March 2024*

- Engineered real-time streaming data pipelines handling millions of events/day with queues caching mechanisms.
- Optimized event recovery backfill systems, reducing pipeline downtime and improving reliability.
- Created ETL documentation system diagrams, improving transparency and debugging efficiency.

DXC Technology LLC **Remote, US**
Sr. Analyst III Software Engineering *June 2023 – September 2024*

- Boosted Django API throughput 3x by restructuring endpoints and optimizing data models for scalability.
- Designed AWS-native CI/CD pipelines that streamlined deployment/monitoring, saving 50+ developer hours monthly.
- Pioneered AI/LLM integration by deploying OpenAI Azure Cognitive Services into production, aligning with innovation goals.

Software Engineering Intern *August 2022 – May 2023*

- Built a resume clustering ML model (NLTK, word2vec) improving project allocation efficiency by 20%.
- Developed Spark-based data aggregation pipelines into Azure Blob, cutting retrieval time from days to hours.
- Automated centralized logging with AWS ELK stack, reducing log analysis time by 30%.

Certifications

https://www.credly.com/users/sijan-malla

- AWS Certified SysOps - Associate
- AWS Certified Developer - Associate
- AWS Certified Solution Architect -Associate
- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals

Skills

Languages: Python, JavaScript

Frameworks: Django, Flask,

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & Infra: AWS (Lambda, CloudFormation, S3), Azure, Docker, Kubernetes, CI/CD (GitHub Actions)

Domains: Backend Systems, Data Pipelines, Microservices, Serverless, AI/LLM Integration

Tools: Git, Linux, Postman, Jupyter

Education

University of Louisiana Monroe, BS in Computer Science August 2019 – May 2023
